MID Labs: Elevating Vision Care

Nestled in the vibrant San Francisco Bay Area, MID Labs stands as a beacon of innovation in ophthalmic healthcare. Our resolute mission is to exceed expectations by delivering ingenious, world-class solutions that safeguard and enhance the vision of patients across the globe.

Our exceptional team of dedicated professionals embodies the values of collaboration, initiative, integrity, and uncompromising attention to precision.

At MID Labs, we are more than innovators; we're visionaries. As pioneers of vitrectomy technology, we have revolutionized surgical procedures, crafting instruments that set global benchmarks. Our diverse product line, distributed in over 30 countries and continuously expanding, features Vitreous Cutters, Bi-Blade Vitreous Cutters, and the Single-Step Cannula Insertion System.

Select MID Labs as your trusted partner.

Together, we are not merely shaping the future of eye health; we are illuminating it.

Our Business Throughout the Years

- 81 MID Labs is founded by Dr. Carl Wang. Dr. Wang was associated with vitreoretinal surgery from its infancy. In 1975, his Ocutome[®] 800 became the first complete system for posterior vitrectomy.
- The MicroVit[®] system introduced venturi aspiration to vitreoretinal surgery and the MicroVit[®] probe provided the first disposable high-quality vitreous cutter surgical system.
- MID Labs introduced the SupraVit[®] VitreoRetinal Surgical System with a revolutionary aspiration system and an Extended Use Vitreous Cutter.
- MID Labs launched the Vit Enhancer[®] and Adaptable Vit Enhancer[®] as High Speed Vitreous Cutting Systems, creating an evolution in vitreous cutting.

2005 MID Labs introduced a non-system exclusive 25 Gauge Vitreous Cutter line, making microincision vitrectomy available for a wide variety vitreoretinal surgical systems.

- 2009 MID Labs introduced the 27 Gauge Vitreous Cutters, 25 and 23 Guage Cannula Insertion Systems as well as developing specialty Vitreous Cutters, for OEM partners.
- 2011 MID Labs introduces the UVE (Ultimate Vit Enhancer®) offering an 8000 cpm capability, allowing enhanced vitreous cutting capabilities to be added to existing surgical systems.
- 2014 MID Labs receives Joint Venture financing led by OrbiMed and Frontline BioVentures and is well positioned to leverage it's technology and leadership in vitrectors while broaden it's product lines on a global basis.
- 2016 MID Labs introduces Bi-Blade[®]. The new MID Labs Bi-Blade[®] Vitrectomy Cutter provides enhanced performance, improved surgical control, and increased surgical efficiency.
- MID Labs continues to innovate with it's own product line and is a supplier to major ophthalmic system manufacturers in Europe, Asia and within the USA.
