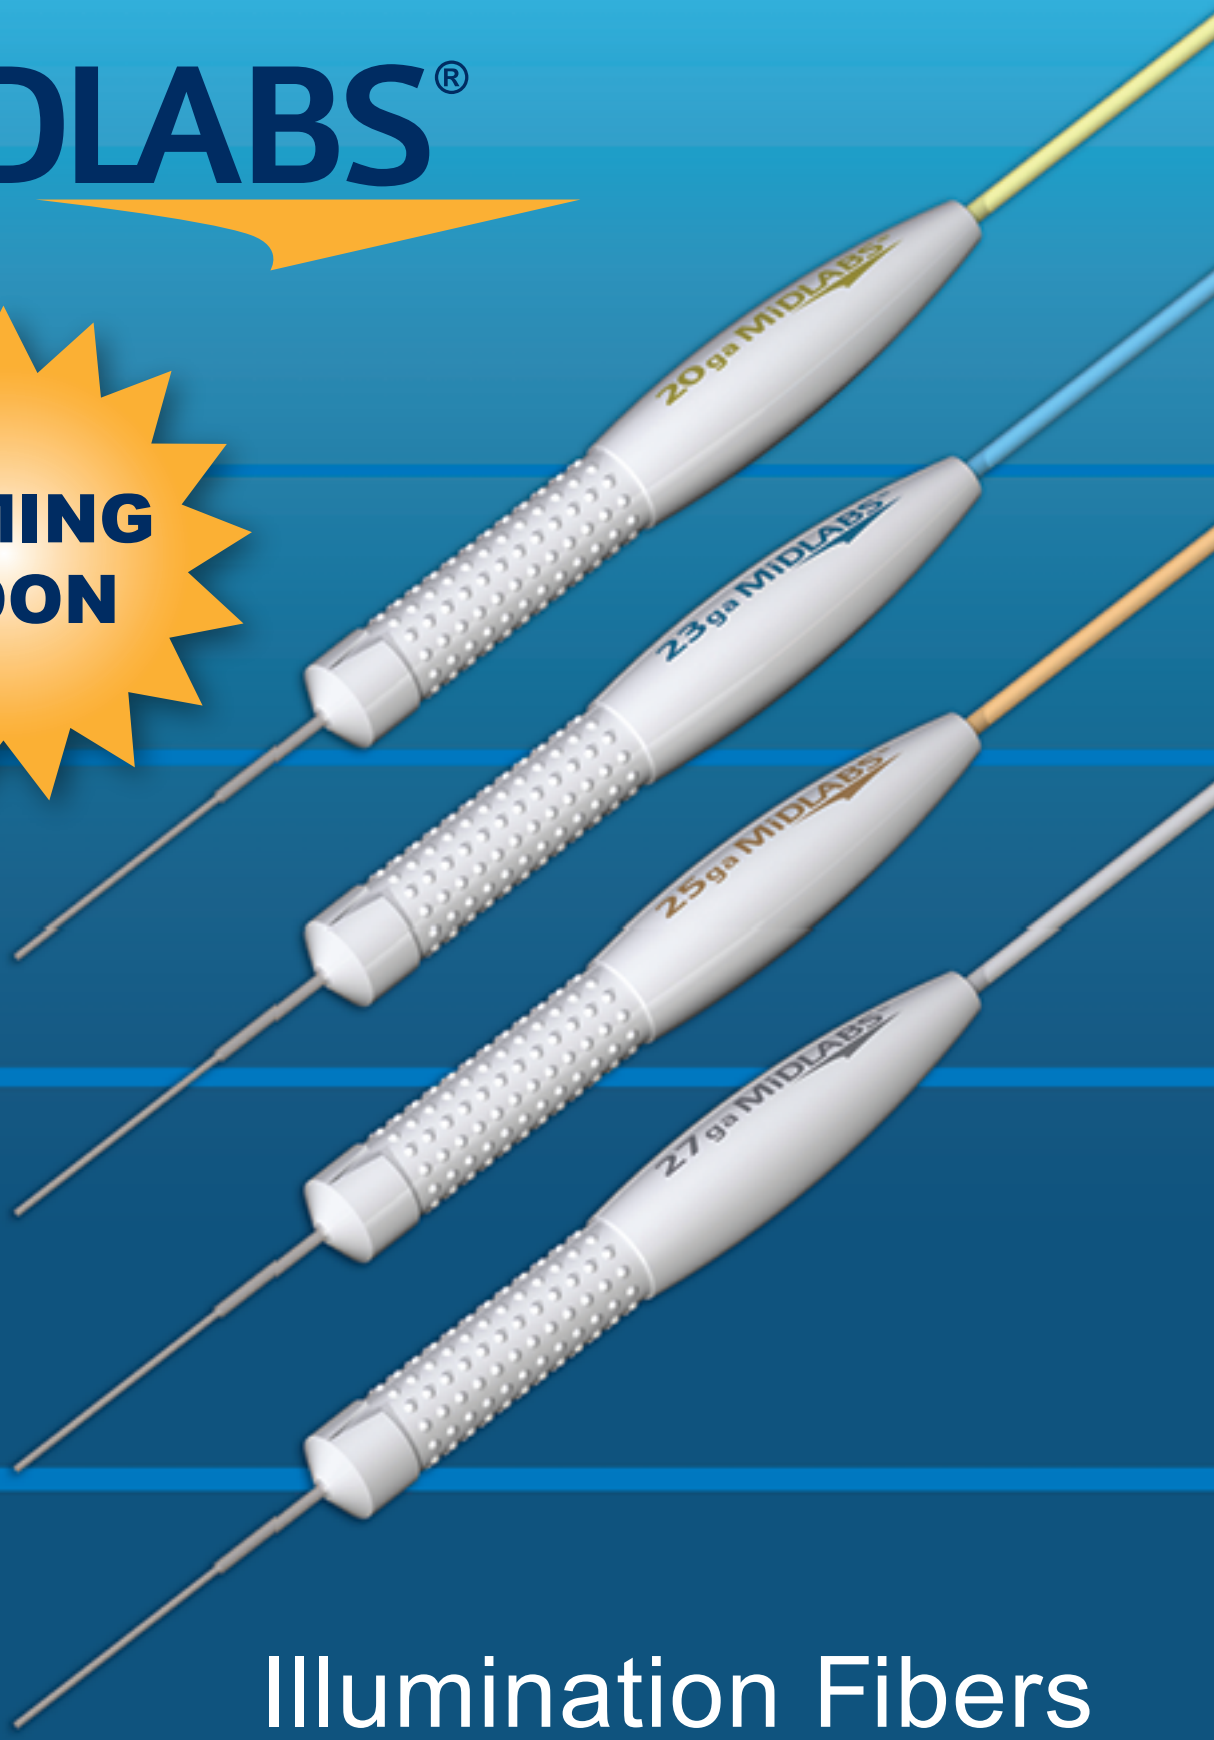
COMING SOON



Illumination Fibers

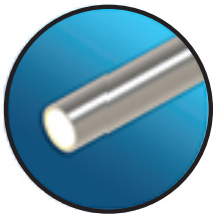
...available in 3 tip types

MiDLABS®

Medical Instrument
Development Laboratories, Inc.

Illumination Fiber

…available in various gauges and tip types



Spot Illumination

- Available in 20 gauge, 23 gauge, 25 gauge and 27 gauge
- Provides high intensity illumination within a central area

Wide Angle Illumination

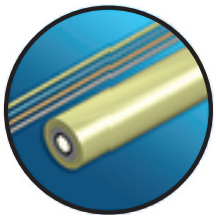
- Available in 20 gauge, 23 gauge and 25 gauge
- Diffuses illumination over a large area

Shielded Wide Angle Illumination

- Available in 20 gauge, 23 gauge and 25 gauge
- Shielded illumination protects surgeon's eyes

Support Sleeve

- Reduces potential needle bending
- Controls depth of insertion



Tri-Layered Fiber Jacket

- Reduces light leakage
- Color coded to identify instrument gauge
- Smooth and flexible material–reduces tangling

CE 0197

Proven Quality

- Made in the U.S.A. ISO 13485:2012 Certified

Compatible with Major Brands

Medical Instrument Development Laboratories, Inc. · San Leandro, CA 94577 U.S.A.
